NCS S 7020-Y80R

E060 Autumn Ocher
NCS S 3050-Y20R

ENG Colour samples are as close to the real as printing technology allows. Test painting is always recommended on a small area of the wall surface of the house. Allow the paint to dry and take your time to observe the color at different times of the day.

FIN Värimallit ovat niin lähellä todellisia kuin painoteknisesti on mahdollista. Koemaalasta talon seinäpintaan tai irtolevyyn suositellaan aina. Anna maalin kuivua ja tarkastele sävyä rauhassa vuorokauden eri aikoina.

SVB Färgproverna är så nära verkliga som trycktekniken tillåter. Provmålningen alltid rekommenderas för väggens yta. Låt färgen torka och titta den i fred vid olika tider på dagen.
